

Amazon Sales Data Analysis

2019-2020 Performance Overview

Comprehensive analysis of 5,901 transactions across US regions, revealing growth trends and strategic opportunities in retail performance.

DATASET OVERVIEW

Understanding the Data

The dataset contains 5,901 sales transactions from January 2019 to December 2020, covering office supplies, furniture, and technology products across all US regions.

- 21 data columns tracking orders, customers, products, and financials
- All 50 states plus DC represented
- Three customer segments: Consumer, Corporate, Home Office
- Low return rate of just 1.3% of total quantity

Key Performance Metrics

Total Sales

Revenue across all categories and regions

Total Profit

11.2% average profit margin

Units Sold

Averaging 3.78 units per order

Total Orders

Transactions over two-year period

Remarkable Year-Over-Year Growth

Sales nearly doubled from 2019 to 2020, driven by increased technology demand amid remote work trends. Profit grew 77%, demonstrating strong operational efficiency.

Category Performance Analysis

Office Supplies

\$644K Sales • 41% of total

Highest volume with 14,326 units sold across 3,538 transactions. Strong in everyday essentials.

Technology

\$471K Sales • 30% of total

Highest profitability at 19% margin. Phones and copiers drive premium returns.

Furniture

\$452K Sales • 29% of total

Lowest margins at 2%. Chairs lead sales but tables show negative profitability.

Regional Distribution

West Region Dominates

The West leads with 33.4% of total sales, driven by California's 1,189 orders. East follows at 28.8%.

Opportunity: South region shows expansion potential at just 16.1% of sales.

 TOP PERFORMERS

Best-Selling Products

01

3D Systems Cube Printer

\$14,335 in sales • 2nd Generation, Magenta model leads technology category

03

HP LaserJet Series

\$13,838 in sales • Reliable printing solutions for business customers

02

Canon imageCLASS 2200

\$14,077 in sales • High-end copier popular with corporate segment

04

GBC DocuBind TL300

\$12,890 in sales • Professional binding equipment for office use

Customer Segment Breakdown

Consumer

2,997 transactions • ~\$793K in sales

Corporate

1,774 transactions • ~\$470K in sales

Home Office

1,130 transactions • ~\$302K in sales

Consumer segment dominates, with top customer Caroline Jumper spending \$11,597. Technology purchases drive repeat business across all segments.

Monthly Sales Trends

November and December show strong holiday peaks at \$177K and \$186K respectively. April dips to \$96K, likely reflecting pandemic impacts.

Key Takeaways & Next Steps

Expand Technology Focus

Prioritize high-margin tech products in West and East regions where demand is strongest. 19% margins offer significant growth potential.

Optimize Furniture Strategy

Address negative margins on tables through pricing review and discount reduction. Focus on profitable chairs category.

Target South Region Growth

Develop expansion strategy for underperforming South region, which represents only 16% of sales despite market potential.

Investigate Return Patterns

Analyze 287 returns concentrated in Binders and East region to identify quality issues and reduce future losses.

Executive Summary

This report provides a comprehensive analysis of Amazon sales performance across all regions, product categories, and customer segments. The data reveals strong year-over-year growth with particularly impressive Q4 performance driven by holiday season sales.
